ORACLE GLOBAL TRADE INTELLIGENCE

Available in the Oracle Cloud

Effective decision-making is vital to the success of any compliance organization. Oracle Global Trade Intelligence, Oracle's customs & compliance focused business intelligence solution, promotes better supply chain decisions by providing greater insight into both internal operations and trading partner performance. Oracle Global Trade Intelligence provides you with the information needed to understand what's happening in your business so you can achieve your organizational goals.

KEY FEATURES

- Configurable dashboards with user-defined performance metrics
- Ability to monitor metrics against business targets, benchmarks, and forecasts
- Role-based alerting to ensure the right personnel are notified of exceptions and deviations from plan
- Drill down from a metric into supporting trade data to pinpoint trouble spots
- Ad-hoc querying and reporting of your compliance information

KEY BENEFITS

- Increases the value of existing trade, compliance, and customs data
- Obtain a single, consistent view of customs and compliance information
- Promotes effective decision making at multiple levels of the compliance organization
- Raise awareness of the impact of compliance on the overall success of the business

Performance Management

Setting and tracking goals within your compliance or customs organization is a key factor in improving compliance and reducing costs. Oracle Global Trade Intelligence (GTI) leverages detailed and extensive trade data to enable real-time action and historical analysis of key factors affecting your import and export operations. GTI provides a mechanism to monitor key performance indicators while also allowing seamless navigation between historical and operational information.

With user-friendly and easily customized screens, GTI provides actionable insight that helps ensure the right decisions are being made.

ORACLE®

Key Performance Indicators

Oracle Global Trade Intelligence provides a dashboard view into the unique metrics by which your customs and compliance operation measures success. Users have the ability to modify existing formulas and / or create custom measurements of their own that suit their specific needs. Some of the standard areas within GTI are:

- **Statistical**: Total Shipments, Total Sales Orders, Total Purchase Orders, Average Gross Weight and Net Weight, Average Gross Volume and Net Volume
- **Financial**: Total Cost, Declared Value, Billed Amount, Freight Charges
- **Regulatory**: Restricted Party List Screening, Sanctions and Embargoes, Regulatory Controls, License Assignment, Exemptions Used, Country of Origin, Documents Required
- **User Workload**: Item Classification, Restricted Party List Screening, License Assignment
- **Process Analysis**: Suppliers, Business Divisions, Product Families, Regions and Countries, Calendar and Fiscal Periods, Status Updates, Users

Integrated Logistics Platform

Oracle has a holistic approach to logistics management. Oracle Global Trade Intelligence when licensed with Oracle Fusion Transportation Intelligence* allows users to build consolidated dashboards that expose reports and KPIs from both trade and transportation processes. As a single native trade and transportation platform, users can easily maintain both strategic and tactical views of their entire logistics platform.

* Oracle Fusion Transportation Intelligence is a separately licensed product.

Flexible Deployment Options

A broad range of deployment and pricing options are available for Oracle applications. In addition to traditional, on-premise models, Oracle offers a comprehensive portfolio of modern cloud solutions which provide customers with the widest selection of choices to meet their evolving business, IT infrastructure, and development needs.
