

Modern HR in the Cloud

Oracle Learning and Development: Oracle Learn Cloud Service

MODERN LEARNING
PERSONALIZED

KEY FEATURES

- Personalized LearnCenters
- Highly configurable user interface and workflows
- Virtual classroom integration
- Rapid content development with WYSIWYG HTML editing tool
- Page editing and widgets with HTML5 for mobile responsiveness
- AICC and SCORM compliant
- Electronic signatures
- Compliance and certification
- Online survey and assessment builder with question banking
- Built in eCommerce
- Bulk loader for ILT and enrollments
- Oracle Business Intelligence (BI) reporting

Oracle's industry-leading learning and development solution enables you to transform traditional training into a modern learning solution that is agile, social, and personalized for your business. Integrated with Oracle's HCM suite, the solution helps you maximize talent, and drive performance and engagement throughout the employee lifecycle.

Effective learning and development is critical to high-performance talent management strategies. Oracle Learn Cloud not only enables you to increase the compliance, quality, and productivity of your employees, but also to prepare your talent to take on future challenges and support business growth.

When employees are engaged and thriving, they are more likely to be agile and resilient. Focus on your most valuable asset – people – and transform learning and development by empowering your employees.

Personalized Learning

The Oracle Learn Cloud makes it fast and easy to design your own learning program with highly configurable learning portals, called LearnCenters, which can be personalized to meet the unique needs of your business, workflows, audiences and corporate brand.

Extended Learning

With these highly configurable LearnCenters, you can extend learning programs to include participants outside your organization, such as customers, contractors and partners, with differentiated learning content that meets their specific needs.

Analytics and Return on Investment

Sophisticated analytic tools provide insight into the effectiveness of your learning programs that are both measurable and actionable. Run standard reports, or create custom reports from scratch using Oracle's embedded Business Intelligence (BI) technology.

Centralized Content Management and Delivery

Using our rapid authoring tool and a host of content management capabilities, you can quickly create, manage, reuse and distribute learning content through a single platform. You can also import learning content created with third party tools or acquired from external content vendors. Oracle Taleo Learn Cloud is fully compliant with all versions of the SCORM and AICC industry standards for eLearning content.

Mobile Learning

Access learning and multimedia content anywhere, anytime, from any mobile device. Start training on a desktop and complete it on a mobile device without any disruption. Take learning with you wherever you go.

MODERN LEARNING
PERSONALIZED

KEY BENEFITS

- Personalized learning solution for your modern enterprise
- Seamless integration with strategic talent management
- High impact learning programs that drive business performance
- Extended learning for external audiences

Mobile Responsiveness

Take Mobile one step further by creating innovative, modern User Interfaces for your LearnCenters using the visual Page Editor and site design tools. Page design and screen objects utilize HTML5 to ensure that your user interface will adjust and adapt to the size and orientation of the learner's screen.

Experiential and Collaborative Learning

Our learning system is designed to provide employees with a continuous learning model that can be incorporated into their every day work experience. From instructor led training (ILT), virtual ILT, classroom training, on-the-job training to self-paced training, we provide learners with a blended learning experience combined with various collaborative tools such as ratings, reviews, and forums to enhance experiential learning.

Compliance and Certification

If your organization operates in a regulated industry, you can minimize risks and reduce costs by recording and capturing all certifications and eSignatures in compliance with industry standards such as 21 CFR Part 11 validated by USDM.

eCommerce

Turn your learning management system into a revenue stream through our built-in eCommerce engine that allows payments in the U.S. as well as other global currencies.
