- Collaborate with trading partners and share essential trade data
- Maintain oversight, visibility, and control of customs procedures and filings

RELATED PRODUCTS & MODULES

- Oracle Global Trade Management
- Oracle Trade Compliance
- Oracle Transportation Management

Importing and exporting goods in support of ever changing global supply chains creates complex challenges for customs teams, especially with each region's unique customs processes and procedures. Oracle Customs Management enables companies to manage global customs filings and communicate easily and accurately with authorities and trading partners on all of their cross-border transactions.

Centralize Global Customs Management

Does your company have regional processes for managing various customs procedures? Do you find it difficult to manage all regulatory and partner mandated trade data in your current customs environment? Does your customs team talk to your export team to leverage similar business processes?

Today, most organizations outsource customs processes to their broker or manage it within a fragmented organizational structure. Both of these approaches lead to challenges regarding visibility to goods, control of processes and product allocation, and overall supply chain cost effectiveness. Oracle Customs Management is a global application companies can use to model their unique customs processes and procedures. Each company's approach is based on the specific industry, governing rules and regulations, commodities they trade, countries with which they trade, and the processes employed—whether import or export.

Oracle Customs Management offers the ability to model global customs regimes and procedures using common workflow, tools, and datasets. This global approach enables companies to have similar, standardized processes for customs that incorporate the regional nuances of each customs regimes.

Figure 1 – Customs Management Process Steps

- Standardize Customs Processes: Model global customs regimes using common tools and workflow to ensure consistent and accurate customs processes with support for regional differences.

- Virtual Shipment Consolidation: Consolidate shipments for the purposes of import or export filings and generating consolidated commercial invoices.
- Customs Value, Duty & Tax Calculation: Carry out Customs Valuation and estimate Duty & Tax amounts to be paid along with ELC amount for filing and visibility purposes.

Electronically Communicate With Authorities & Trading Partners

Oracle Customs Management helps companies reduce spend and reliance on trading partners while increasing visibility of customs processes. With the ability to format and produce electronic filings for self-filing, or to communicate electronically with customs brokers, Oracle Customs Management can decrease your reliance on your trading partners, increase your data accuracy, and help insource portions of the customs process.

- Freight Forwarder & Broker Collaboration: Share data electronically with trading partners reducing the need for duplicate data entry and reducing errors. Receive electronic responses from trading partners for action or archival purposes.
- AES Filing Support: Support for filing directly with AES for US export transactions. Determine when AES Filing is required, which lines are required, and submit the required data directly to US Customs & Border Protection / US Census.

Do you want to reduce your reliance on your trading partners? Are your broker charges and fees higher than your company would like? Do you want more control and visibility of your customs processes?

Integrated Logistics Platform

Oracle has a holistic approach to logistics management. Using a single system approach, which includes Oracle Transportation Management, Oracle Global Trade Management, Oracle Trade Compliance and Oracle Customs Management, Oracle is able to provide visibility to trade and transportation order and shipment data in one application. Additionally, a robust supply chain event management and workflow engine allows companies and their trading partners to share data and documents, and more effectively control what they need, when they need it.

- **Document Management:** Determine and produce the necessary customs documents for each transaction. Validate the availability of key data elements. Use auto-assignment logic to help populate missing fields. With both Oracle Transportation Management and Oracle Global Trade Management it is easy to produce documents that require both trade and transportation data to complete and produce.
- **Shared Data Model, Workflow, and Services:** Built on a common platform, data objects are shared between Oracle Transportation Management and Oracle Global Trade Management allowing trade and transportation teams to work off a single source of truth and maintain complete visibility over the shipment as it progresses. Shared workflow and services allow for execution of cross-functional processes and seamless sharing of information, documents, and more.

Flexible Deployment Options

A broad range of deployment and pricing options are available for Oracle applications. In addition to traditional, on-premise models, Oracle offers a comprehensive portfolio of modern cloud solutions which provide customers with the widest selection of choices to meet their evolving business, IT infrastructure, and development needs.
